Item Ratings - Relationships/Comments

This section displays detailed information about the individual items, organized by category.

Results are displayed both as a bar graph and in numerical form.

The category name appears on the left, and the items related to the category are listed in the order in which they appeared in the assessment.

Directly beneath each item statement is the distribution of ratings, which shows the number of respondents who gave ratings at each point on the scale (e.g., 2 people may have given a rating of 4, 3 people gave a rating of 5, etc.).

The horizontal bar graphs and corresponding number to the right display the item score on the primary scale, based on the relationship type. The first bar shows the overall score from all respondents. The remaining bars show the average ratings given by each rater relationship (e.g., peer, manager, etc.).

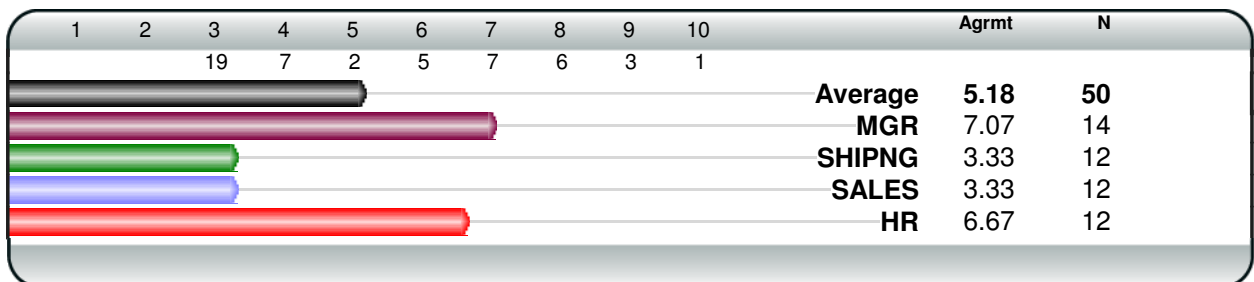

Column 1: Displays the scores for each item on the primary scale.

Column 2: Displays the total number of individuals who rated this item. This number can vary across items because some respondents may have skipped some items.

If any respondents wrote comments about a particular item, the comment appears immediately below the bar graphs. Each dash (-) represents a comment from a different person. This section may be customized to group comments by rater relationship.
